

InverPro VS WiFi

IH30-W

AQUA[®]
FORTE

Channel: MPP Pool Brick & Mortar

USP'S

- **InverSilence® Tech**

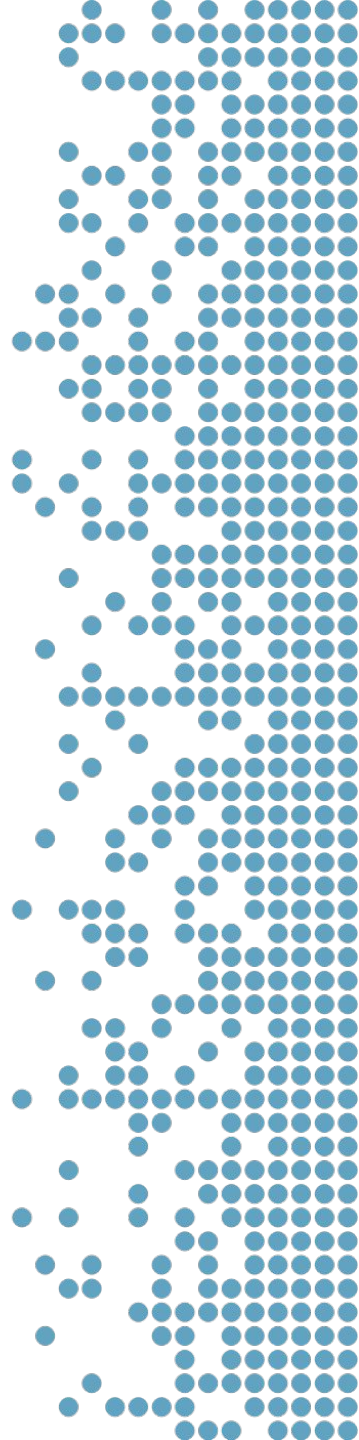

- InverSilence® combines full inverter technology, a volute hydraulic system and a DC brushless motor. It enables the pump to intelligently operate between 30% and 100% capacity, adapting to various applications like filtration and backwash. This innovative technology not only reduces the sound level by more than 30 times but also saves up to 90% energy.

- **30X Silence 36.0 db(A)**

- Brought by the InverSilence® tech, the sound level is 30 dB(A) lower compared to traditional SSP pumps, resulting in an exponentially and dramatically reduced sound intensity.

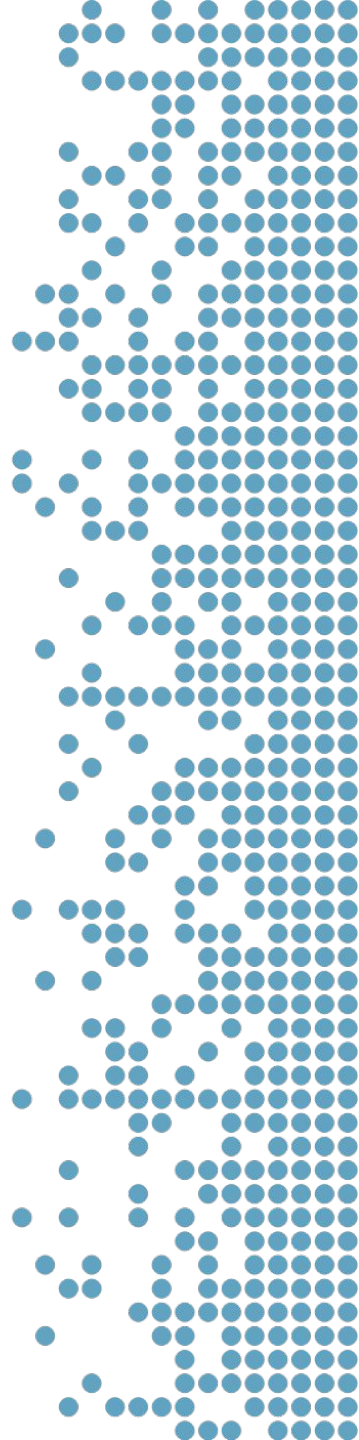

- **15X Saving**

- With magic Inverter technology, the pump achieves up to 15 times more energy savings.

Other features

- Auto Inverter mode: After setting the water flow, the pump automatically detects the system pressure and adjusts the running capacity to ensure a constant flow
- Manual Inverter mode: The running capacity can be set manually to meet different application needs
- Power consumption reading
- Flow reading
- One-click backwash

Technical details

Model	Advised pool volume (m ³)	P1 (kW)	Voltage	Qmax (m ³ /h)	Hmax (m)	Q at 8m (m ³ /h)	Q at 10m (m ³ /h)
RD352 (IH30-W)	50~80	0.09~1.5	220~240v 1ph	30.5	17.8	13.0~30	11.6~28.1
